

PELLETS LINE

"POREČ MOSNA"

Respected,

Pictures of pellet production line with short description.

1. Front line of factory.
2. Front line of factory.
3. Stove.
4. Front line of factory.
5. Front line of factory.
6. Drying capacity up to 12 t/h.
7. Interior part of line.
8. Interior part of line.
9. Press brand "Matador" capacity 3 t/h.
10. Dryer.
11. Packaging line capacity up to 6 t/h.
12. Control room.
13. Control room.
14. Part of the land for disposal raw materials.
15. Part of the land for disposal raw materials.

Besides this, there is also a line for wood stiffening that is not mounted yet, and moving raw mill for wood which is tested.

Technically everything is prepared to set up another press, which would increase production capacity for another 6 t/h.

The factory is around the National park "Đerdap", municipality Majdanpek, and therefore the delivery of the raw material is cheaper and there is a priority in supply in relation to all those that are not located on the territory of the municipality.

There is possibility for water transport on the Danube from harbor Donji Milanovac which is a few kilometers away from factory.

All equipment in factory is imported from Denmark and Sweden. Detailed description of the equipment is on the site (UPIŠITE SAJT).

FOR ALL QUESTIONS AND POSSIBLE COOPERATION FEEL FREE TO CONTACT ME
